Forward Deployed AI Engineer and McGill BSc student working across AI systems, behavioral research, and health technology. Builds AI tools end to end, from workflow discovery and technical scoping through implementation, testing, demos, documentation, and adoption. Experience includes client-facing engineering, internal AI enablement, scientific research and writing, digital health strategy, growth operations, and teaching.

EDUCATION

McGill University | Bachelor of Science | Montreal, QC | *Expected 2027*

- Major in Psychology; Minor in Interdisciplinary Life Sciences; cumulative GPA: 3.68 / 4.0.
- Completed coursework includes Integrative Neuroscience, Behavioral Neuroscience, Cognition, Social Psychology, Psychological Statistics, Statistics for Experimental Design, Mammalian Physiology I and II, Human Perception Laboratory (MATLAB), Foundations of Programming (Python), Global Health, and Psychology Research Experience.
- Planned advanced coursework for 2026-2027 includes Circuitry of the Human Brain, Human Decision-Making, Sensorimotor Neuroscience, Human Memory, Cognitive Development, Hormones and Behavior, Personality, and Human Motivation.

University of New South Wales | Semester Abroad | Sydney, Australia | *2026*

- Cognitive Science: 81, Distinction; Social and Developmental Psychology: 81, Distinction; Creative Entrepreneurship: 88, High Distinction; Inside the Criminal Mind: 76, Distinction.

PROFESSIONAL EXPERIENCE

Forward Deployed AI Engineer | Lake House Group | Montreal, QC | *July 2026 - Present*

- Conduct client and operator discovery calls, map existing workflows and data constraints, and turn demonstrations and feedback into scoped AI solutions with clear success criteria.
- Serve as the sole engineer for assigned work, building solutions end to end from technical design and API integration through testing, documentation, live demos, and user handoff.
- Built and internally validated a recurring reporting workflow that converts approved source data into verified metrics, written insights, and review-ready deliverables, with automated QA and explicit human approval before release.
- Owned the end-to-end hardening of a design-to-email workflow, adding API-based asset processing, cross-platform setup, automated checks, feedback loops, and reusable operator documentation.
- Deliver live and recorded demos, setup guides, and walkthroughs; collect user feedback and iterate directly to improve accuracy, usability, and adoption without a separate engineering handoff.
- Co-lead internal AI adoption as the technical expert through workshops, employee teaching, reusable skills and plugins, coding-environment training, deployment guidance, and migration support.

Research Assistant | McGill Health Psychology Lab | Montreal, QC | *April 2025 - Present*

- Develop a pilot study on health-risk behavior using cursor-tracking software to assess readiness for change.
- Design methodology, questionnaires, experimental protocols, and behavioral measurement tools aligned with Transtheoretical Model constructs.
- Co-lead a JBI-compliant umbrella review on stage-of-change measurement fidelity in health interventions, screening and synthesizing systematic reviews and meta-analyses.

AI Training Expert | AfterQuery | Remote | *November 2025 - February 2026*

- Generated expert training data for AI models across scientific research, education, and finance.
- Reviewed and refined LLM evaluation rubrics against clinician, financial analyst, and PhD-level benchmarks.
- Assessed model self-grading quality and output equivalence across evaluation frameworks.

Staff Writer, Science & Technology | The Tribune | Montreal, QC | *September 2025 - Present*

- Write research briefs on publications from McGill labs across neuroscience, physiology, psychology, and global health.
- Interview researchers and event stakeholders, cover conferences, and translate complex findings for a general audience.

Growth and Development Intern | BetaTown Venture Studio | New York, NY | *May - August 2025*

- Supported early-stage product strategy and go-to-market validation for AI-driven media ventures focused on trust infrastructure, monetization, and creator tooling.
- Led creator and domain-expert outreach and market research to identify user needs in AI-assisted publishing, content verification, and creator workflows.
- Built an internal CRM tracking system and produced investor materials, pitch decks, and brand content.

Marketing and Strategy Intern | Doccla | London, UK | *May - August 2024*

- Planned digital campaigns for a virtual-ward platform across pilot programs in geriatric care, COPD, and diabetes.
- Refined SEO strategy with Google Analytics and analyzed traffic data across digital platforms to guide content decisions.
- Produced patient success-story videos, newsletters, blog articles, web copy, and email outreach for partner and patient communications.

Research Intern | National Institutes of Health | Washington, DC | *January - August 2023*

- Supported clinical trials on chronic back pain in active-duty pilots; collected participant data and managed consent documentation.

TEACHING EXPERIENCE

Pilates and Barre Instructor | LeanBean Fitness | Bondi, Sydney | 2026

- Taught barre, Power Pilates, and strength classes, adapting sequences in real time for different class sizes and experience levels.
- Provided modifications, cueing, and individualized support while maintaining a high-energy, inclusive group environment.

Private Pilates Instructor | Independent | Sydney, Australia | 2026

- Designed individualized mat Pilates programs for rehabilitation, strength, and flexibility goals.
- Built progressive session plans and provided hands-on corrections and cueing for beginners through advanced practitioners.

Pilates Instructor | MVMT Pilates | Montreal, QC | April - December 2025

- Led mat Pilates, Gentle Pilates, and Weighted Sculpt Power Pilates classes with personalized adjustments and attentive support.
- Built rapport with returning clients while maintaining a supportive and inclusive studio environment.

Yoga Instructor | CorePower Yoga | Washington, DC | April - September 2023

- Developed and led weekly sequences for a wide range of yoga proficiencies.
- Recognized as Teacher of the Month during the first month for class popularity, community building, and studio initiative.
- Handled front-desk and retail responsibilities during teaching shifts.

LEADERSHIP AND CAMPUS EXPERIENCE

Engagement and Media Coordinator | BABES McGill | Montreal, QC | February 2025 - Present

- Manage social media and brand content using Figma, Adobe Illustrator, and Canva.
- Coordinate events, sponsorship posts, community growth initiatives, and engagement reporting for sponsor deliverables.

Marketing and Media Coordinator | McGill Nourish | Montreal, QC | January 2025 - Present

- Coordinate digital marketing, market research, and ESG evaluation for sustainability-focused startups and university initiatives.
- Build community outreach and fundraising campaigns that promote sustainable practices.

AI SYSTEMS AND PROJECTS

- **NeuroAI:** Built a leakage-safe EEG subsequent-memory pipeline from real PEERS data, including item-level recall labels, a behavioral baseline, an interpretable spectral EEG model, held-session evaluation, strict train-only normalization, a stacked incremental comparison, portable tests, and reproducible aggregate evidence.
- **RELAY:** Built a Slack-native customer-success agent that detects unanswered questions, tracks SLA risk, retrieves CRM, documentation, GitHub, and Slack context, drafts source-backed responses, and requires human approval before posting. Validated the core loop end to end in a real Slack Connect workspace.
- **HIPAA Guard:** Built and published a seven-agent healthcare compliance scanner that combines deterministic Python checks with AI analysis, proposed fixes, adversarial review, verification, and regulatory citations. Published on PyPI.
- **skill-compass:** Built a harness-neutral capability router that audits installed agent skills and plugins, resolves overlaps, and generates portable routing context for Claude, Codex, and Gemini.
- **SafetyNet:** Built a GitLab Duo agent that checks MISRA C deviation records for completeness under ISO 26262 before human safety review.
- **Growth Agent:** Built product-led growth pipelines for PQL scoring, personalized outreach, referral workflows, anomaly detection, and structured reporting using AI orchestration plus deterministic Python tools.
- **Patient Lifecycle Agent:** Built a synthetic-data lifecycle triage engine that scores risk, routes patients into priority lanes, recommends next actions and channels, generates messages, and flags human escalation.
- **Market Intelligence Agent:** Built an opportunity-discovery engine that maps markets, detects buying-urgency signals, profiles organizations, and ranks leads with reasons for why each opportunity matters now.
- **Inbound Leads Agent:** Built an inbound lead-triage pipeline with inbox scanning, enrichment, SLA scoring, response drafting, prioritized queues, Slack alerts, and pre-call briefs.
- **Outbound Leads Agent:** Built a reusable prospecting workflow that sources and enriches leads, generates bounded personalized outreach, routes campaigns, monitors replies, and updates lead status.
- **Cart Intent Classifier:** Built a classifier that routes cart abandoners into intent-based email recovery flows.
- **Competitor Analysis Agent:** Built an agent for structured competitor and market analysis.
- **Tutor:** Built a folder-first personal AI tutor with multi-format ingestion, Socratic sessions, FSRS spaced repetition, study-material generation, Anki export, research workflows, and proactive reminders; 27 automated tests passed at beta release.
- **PocketPall:** Built an MVP financial-literacy app for students.

SKILLS, LANGUAGES AND CERTIFICATIONS

AI and Engineering: Python, REST APIs, Claude, Claude Code, Codex, Gemini, AI agent and workflow design, Git/GitHub, automated testing, data provenance, evaluation and QA, human-in-the-loop systems, HTML/CSS/JavaScript, JSON.

Product and Delivery: Workflow discovery, technical scoping, rapid prototyping, client demos, user enablement, operator documentation, cross-platform setup, implementation planning, feedback-driven iteration.

Research and Analysis: Experimental design, literature review synthesis, scientific writing, psychological research methods, cursor-tracking study design, statistics, MATLAB, data analysis.

Design and Growth: Figma, Adobe Illustrator, Canva, Google Analytics, CRM systems, lifecycle marketing, market research, patient communications.

Languages: English (fluent), Swedish (proficient), Spanish (proficient), Portuguese (basic).

Certifications: Anthropic Education: Claude Code 101 (2026), AI Fluency for students (2026), and Model Context Protocol: Advanced Topics (2026); 200-hour Yoga Teacher Certification, CorePower Yoga; 50-hour Sculpt Certification, CorePower Yoga; Pilates instructor.
